### Summary

Backend Software Engineer with experience in building high-performance systems and microservices. Passionate about creating efficient, scalable APIs and cloud-based solutions.

### Education

- University of London, M.Sc. in Software Engineering (2016-2018)
- University of Edinburgh, B.Sc. in Computer Science (2012-2016)

### Skills

- Java, Spring Boot, Node.js
- AWS Lambda, Microservices
- RESTful API Development
- PostgreSQL, Redis, Kafka

### Project Experience

- API Gateway: Designed and developed a centralized API gateway using Spring Boot to handle requests from multiple microservices.
- Real-Time Analytics Platform: Developed a system to process and analyze real-time data streams with Kafka and AWS Lambda.

### Work Experience

- Backend Software Engineer, TechCorp (2019-Present): Developed and maintained backend services for cloud-based applications, focused on microservices and RESTful APIs.
- Junior Backend Developer, CodeLabs (2018-2019): Assisted in building and optimizing server-side code and integrating databases.
