Summary

Cloud Data Engineer with a solid foundation in cloud architecture and data pipelines. Specializes in creating scalable, high-performance data solutions on AWS and Azure.

Education

• University of Edinburgh, M.Sc. in Cloud Computing (2017-2019)
• University of Glasgow, B.Sc. in Computer Science (2013-2017)

Skills

• AWS, Azure, GCP
• Data Engineering, ETL Pipelines
• Python, SQL, Terraform
• Docker, Kubernetes

Project Experience

• Cloud Data Pipeline: Built a scalable ETL pipeline for processing large datasets using AWS S3, Lambda, and Redshift.
• Cloud Migration: Led the migration of on-premise databases to Azure SQL Database.

Work Experience

• Cloud Data Engineer, XYZ Ltd (2020-Present): Designed and implemented cloud-based data solutions to support data warehousing and analytics.
• Junior Cloud Engineer, ABC Tech (2019-2020): Assisted in cloud infrastructure setup and maintenance on AWS and Azure.
